

**Features:**

- *Complete with all components to put a system "on the air"*
- *Accelerates the integration process*
- *Full technical support included with purchase*
- *Allows development of interface to your system*
- *Allows development of your control software*

**Benefits:**

- *Simple to set-up and configure*
- *Low cost, high power solution*
- *Accelerates the integration process*

The ZMN2405HP DK Pro Developer Kit comprises five high power serial interface boards built around the 100mW ZigBee zMN2405HP module. The ZMN2405HP DK Pro allows developers to get up and running quickly using either USB or RS-232 interfaces.

The self-contained modems have momentary switches, LEDs, thermistor, and potentiometer, and can operate on standard alkaline batteries. This provides a simple, effective way to test the range and operation of the radios in the real-time environment. The onboard I/O can be disconnected, allowing user inputs to be connected to the module inputs using connectors.

The ZBDemo program included on the supplied CD allows the reading and writing of end device inputs and outputs, as well as network discovery and configuration. If your individual wireless requirements could benefit from the application of ZigBee technology, the ZMN2405HP DK Pro is the premier first step.

The ZMN2405HP KD Pro should be also be selected by those wishing to use the RFM ZMN2430HP module.

**ZMN2405HP DK Pro**

**Pro ZigBee<sup>®</sup> Developer Kit**

**Developer Kit Contents:**

- *5 ea. evaluation boards*
- *5 ea. AC power adapters and cords*
- *5 ea. patch antennas*
- *5 ea. USB cables*
- *5 ea. serial cables*
- *5 ea. RF cables*
- *5 ea. omni antennas*
- *5 ea. 9V batteries*
- *1 ea. software CD*
